

# Detailed working of our java application

Open the following link google drive link for a video showcasing the working of our java application:

[https://drive.google.com/file/d/1cUzwKUq8xlfDrTmE-o-SXmzB4kvb\\_Wpu/view?usp=sharing](https://drive.google.com/file/d/1cUzwKUq8xlfDrTmE-o-SXmzB4kvb_Wpu/view?usp=sharing)

The server machine should run the server.java application.

1. Every client should update the server ip address in client.java with that of the server machine.
2. Now every client should run the chatgui.java application which should open a window prompting the user to enter their username.
3. Now the clients are set to share files and messages in the application window.
